Elect Scott Storms

ed·u·ca·tion -

- Are we failing our children?
- I believe we can do better!

Let's move Connecticut in a new direction.

Education in Connecticut is vital to our future.

As your State Representative, I believe we must ...

Focus on developing and maintaining a competitive and financially responsible public school system which provides our children with college and career ready skills.

Insure that educational funding levels remain stable to avoid extreme adjustments to school budgets which place additional tax burdens on property owners.

Continue to support alternative pathways to graduation for high school students pursuing trade or technology careers.

Change the Freedom of Information (FOI) laws regarding disclosure of parent-student personal information for the safety of our students.
